

Windows Alt Codes - Spanish

In Windows, combinations of the **ALT** key plus a numeric code can be used to type a non-English character (accented letter or punctuation symbol) in any Windows application. More detailed instructions about [typing accents with ALT keys](#) are available. Additional options for entering accents in Windows are also listed in the [Accents](#) section of this Web site.

Three nested data tables

Alt Codes for typing Spanish characters:

| Capitals | Lowercase | Punctuation |
